

Package: californialw (via r-universe)

July 22, 2026

Type Package

Title California Assisted Living Waiver Facility Data

Version 0.1.0

Description Provides reproducible access to prepared public administrative data on facilities participating in California's Medicaid Assisted Living Waiver. Includes 1,224 facility records across 15 counties, licensed capacity, public contact and geographic fields, county aggregates, and statewide enrollment and waitlist context from the California Department of Health Care Services.

Index	4
--------------	----------

californiaalw-package	<i>California Assisted Living Waiver Facility Data</i>
-----------------------	--

Description

R access to prepared public administrative data on facilities participating in California's Medicaid Assisted Living Waiver.

alw_counties	<i>Load California ALW county aggregates</i>
--------------	--

Description

Loads county-level facility counts and licensed capacity together with the statewide enrollment and waitlist context published by DHCS.

Usage

```
alw_counties()
```

Value

A data frame with one row for each of the 15 ALW counties. Statewide enrollment and waitlist values repeat on every row and must not be summed.

Examples

```
counties <- alw_counties()
counties[, c("county", "participating_facilities", "licensed_capacity_peu")]
```

alw_facilities	<i>Load California ALW facility records</i>
----------------	---

Description

Loads prepared public administrative records for facilities participating in California's Medicaid Assisted Living Waiver.

Usage

```
alw_facilities()
```

Value

A data frame with one row per record in the source DHCS feature service. Provider numbers are character values and are not necessarily unique to a row.

Examples

```
facilities <- alw_facilities()
nrow(facilities)
```

alw_metadata	<i>Return provenance and citation metadata</i>
--------------	--

Description

Returns the authoritative DHCS source, the prepared California Care Compass dataset page, repository, license, version and citation information.

Usage

```
alw_metadata()
```

Value

A named list containing source, prepared dataset, repository, license, version and recommended citation values.

Examples

```
alw_metadata()
```
